Version of Python: 2.7.13 Version of Spyder: 3.23

Description – Project 4: Latitudes and programming languages

Installation: Please install on your pc the latest version of Anaconda with Python 2.7 and the latest version of Spyder. The program was run in Windows 10 but it should work also if you use a Mac PC or a Linux distribution.

For this project you must first run the py files: linear_algebra and statistics. Only after that you should run the file of the Mini Project 4.

One can download the Anaconda / Python 2.7 / Spyder here:

<https://www.anaconda.com/download/>

Packages Used:

The following packages should be installed by the anaconda environment when possible or via through pip install package in anaconda prompt: Sklearn, Numpy, Pandas, Seaborn Matplotlib.
